# Year Two Art and Design Equipment List

Before you begin each module, it is important that you ensure that you have the correct equipment. Some of what you need will be available at home; however, there will be other more specialist equipment that you will need to purchase before starting the course. Amazon.com does not necessarily deliver to every country in the world; however, Jackson's Art Supplies (www.jacksonsart.com) is a specialist art supplier that delivers worldwide.
